

ANTICHE MAPPE 10

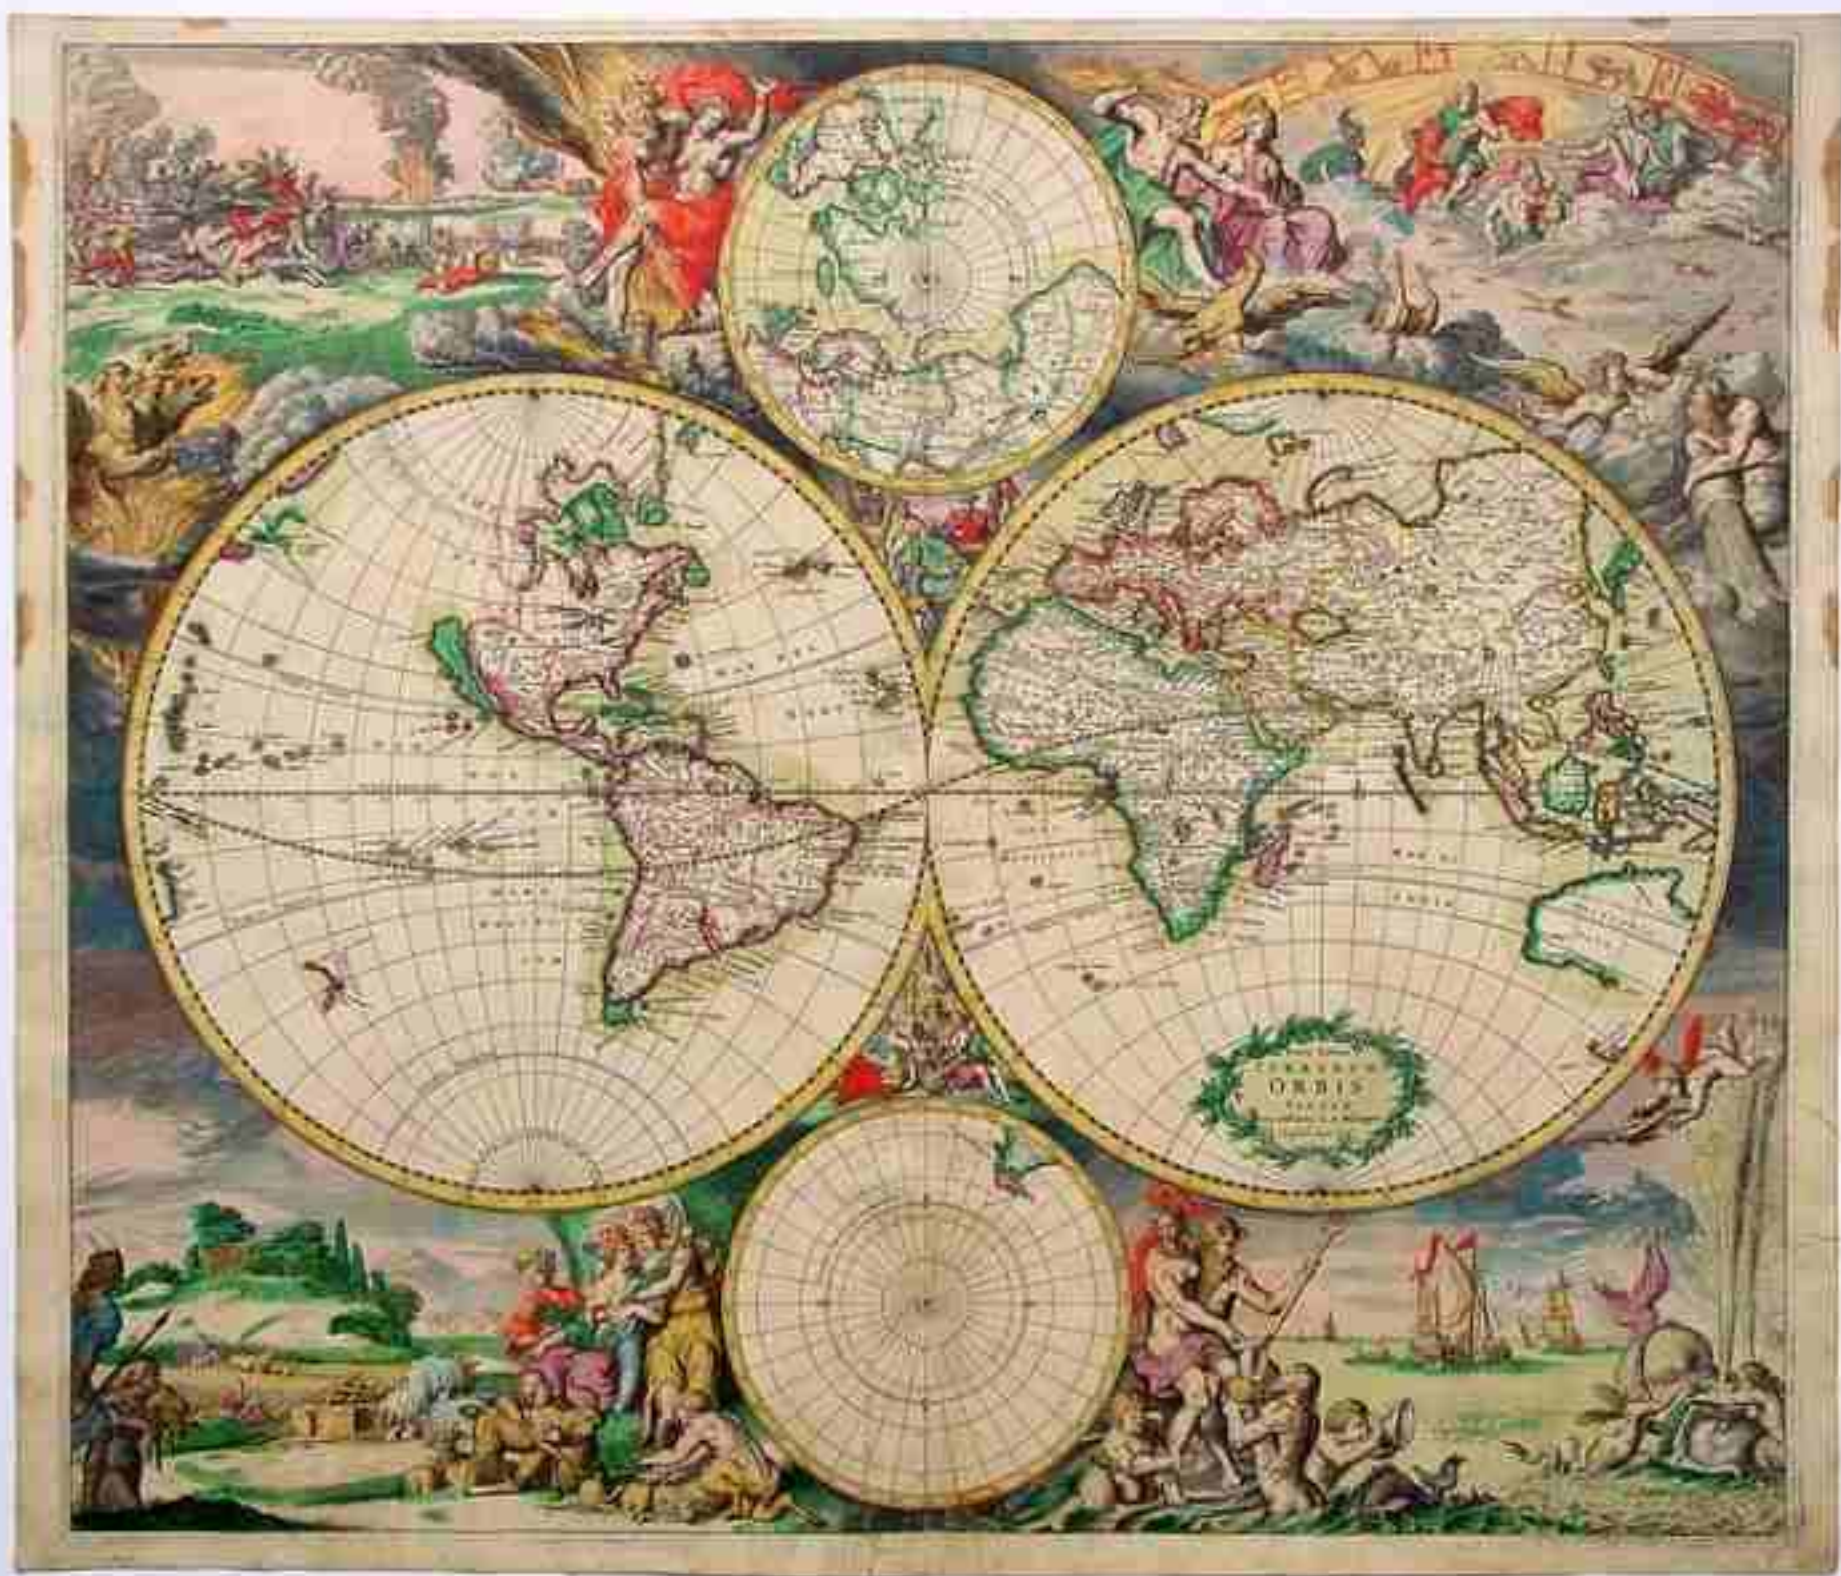

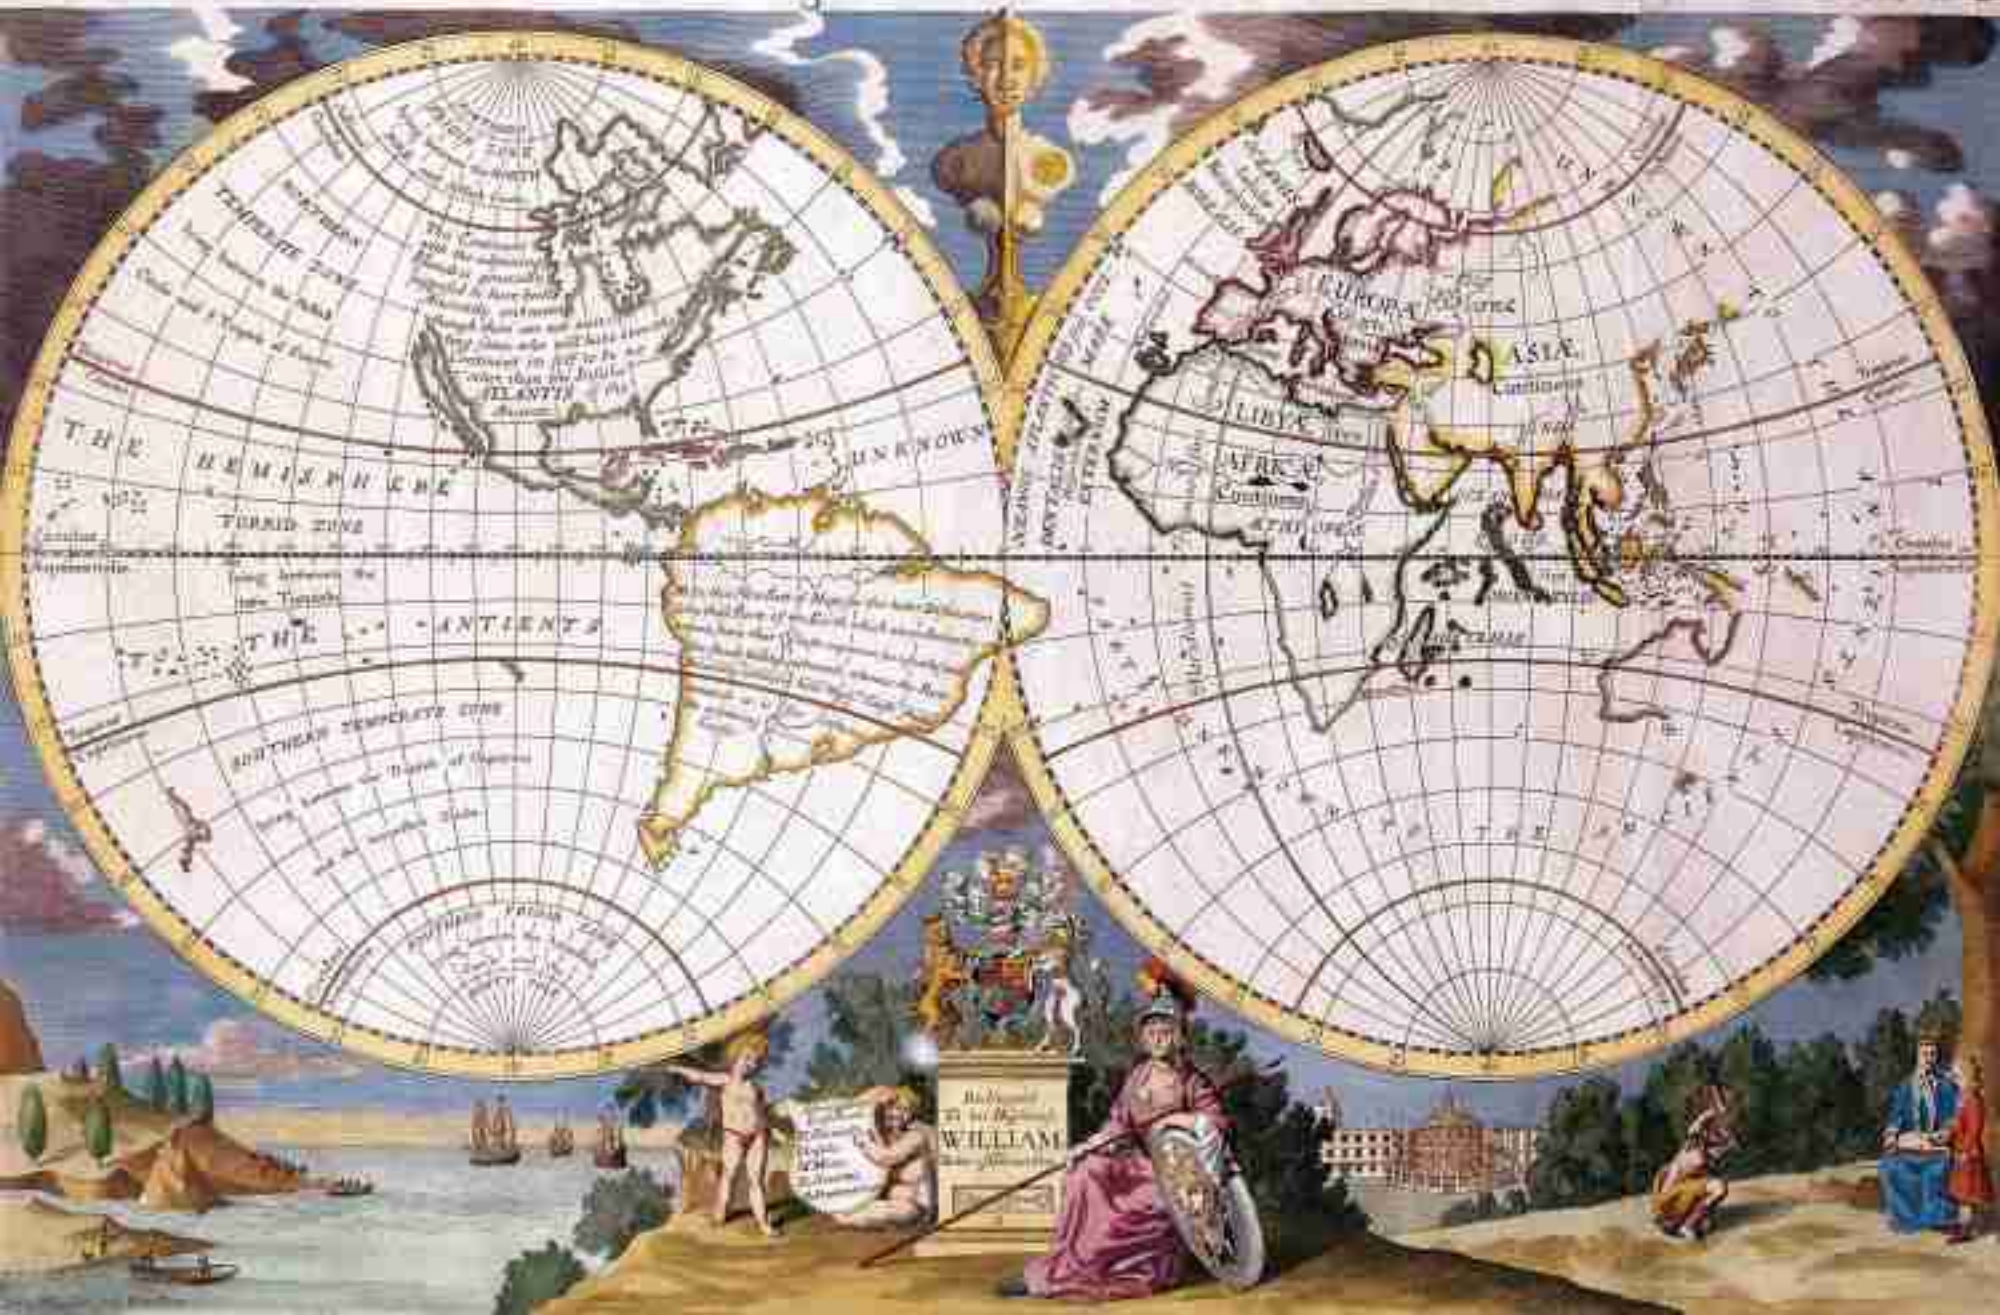

Almagest is a book by the astronomer Ptolemy, which describes the geocentric model of the universe. It is one of the most important works of ancient astronomy, and it has been used by astronomers for centuries. The map shows the world as it was known in the 16th century, with the Americas discovered by Christopher Columbus. The map is a woodcut, and it is one of the most detailed and accurate maps of the world at that time. The map is titled "MARE ARABICVM ET INDICVM", which means "The Arabic and Indian Seas". The map shows the world as it was known in the 16th century, with the Americas discovered by Christopher Columbus. The map is a woodcut, and it is one of the most detailed and accurate maps of the world at that time.
